

ZANAIR HASSAN (.NET DEVELOPER)

 Johar Town, Lahore ·  +923441229867  zanair.hassan@gmail.com

 www.linkedin.com/in/zanairshabbir ·  <https://github.com/ZanairHassan>

I am a dedicated .NET developer with hands-on experience in developing and maintaining web applications using C#, ASP.NET Core, Web APIs, and related technologies. My academic background in Computer Science (IT), coupled with practical project experience, has provided me with a strong foundation in software development and a commitment to delivering efficient and scalable solutions.

EXPERIENCE

DECEMBER 2023 – NOW

DOTNET DEVELOPER, HUBOWEB

Responsible for developing backend code for websites and APIs, engaging in team discussions to refine business logic, and offering documentation to assist the frontend team with backend code integration.

ASKIIAPP

A web application designed to facilitate booking and provide in-house services such as electric vehicle charging and car washing for a UK-based client. The application was developed with React.js on the frontend and ASP.NET Web API on the backend.

AuditApp

This web application leverages asymmetric encryption for user authentication. The API features various actions across multiple controllers, utilizing dependency injection to meet requirements. Services are created for each action, following a code-first development approach.

Patient Utility

A utility designed to determine if a folder is a zip file, subsequently unzipping it, searching for text files within the folder, reading patient data, and storing the information in a SQL database.

SEPTEMBER 2023 – OCTOBER 2023

DOTNET INTERN, SOFTCONSULT

Contributed to the development of web forms, WinForms, SQL stored procedures, and backend code using data annotations. Participated in collaborative discussions with senior developers to enhance business logic.

EDUCATION

SEPTEMBER 2019– SEPTEMBER 2023

BS HONS OF IT, UNIVERSITY OF GUJRAT

I completed coursework that established a robust foundation in software development principles, algorithms, and data structures, while also acquiring in-depth knowledge of information technology and its various applications.

APRIL 2023 – AUGUST 2023

E_DASTERKHWAN APP, FYP

Developed in Flutter (Dart), this project aims to address food waste in low-income communities through a comprehensive food waste management plan that includes source reduction, food donation, and community composting. The E-Dastarkhawan mobile application was specifically designed based on requirements gathered from Lahore restaurants and Dastarkhawan initiatives, ensuring that surplus food is efficiently redistributed to those in need.

SKILLS

- C# basics
- Programing Fundamental
- OOPs concepts
- Dependency Injections
- Restful API's
- SQL Queries writing
- Database design and Database management
- Web technologies
- ASP. Net MVC
- Entity Framework Core
- ASP. Net Core
- Integration testing through Postman
- WinForms, WebForm
- Documentation

Languages

English (Professional proficiency)

Urdu (Native proficiency)

Interest

- Programing personal projects, Technology related meetups with friends, Willingness to collaborate with others.
- Provide constructive feedback and suggestions for improving processes and workflows.
- Be open to feedback and continuously strive to improve skills and performance.
- physical co-curricular activities.
